

Coming from Ukraine: Please register your pet dog, cat, ferret or pet animal of other species

Have you brought your pet from Ukraine to Norway due to the current Russian invasion? The Norwegian Food Safety Authority ask you to provide us with important information concerning your pet animal.

Rabies is present in Ukraine!

Pet dogs, cats and ferrets can be carriers of the rabies virus. In order to ensure that Ukrainian pets do not pose a serious risk to human or animal health in Norway, the Norwegian Food Safety Authority must control all pets entering Norway from Ukraine.

It is important that you fill in the form as soon as possible, if your pet has not already been registered.

Refugees from Ukraine will not be charged financially for registration, control, basic treatment, or any inflicted quarantine of their pets.

We thank you for your cooperation and patience.
