Страна транзита / country of transit ____________________________

Вид транспорта / by the following means of transport: ____________________________

Название получателя и адрес на месте назначения/ Name of consignee and address at place of destination: ____________________________
The undersigned official inspector hereby certifies that:

1. Meat was obtained from the slaughter and processing of clinically healthy animals, originating from premises and districts, officially free from infectious animal disease, including:
   - African swine fever – during the last 3 years in the territory of Norway;
   - Foot-and-mouth disease and swine vesicular disease – during the last 12 months in the territory of Norway;
   - Classical swine fever, Aujeszky’s disease, Teschen disease and porcine reproductive and respiratory syndrome (PRRS) – during the last 12 months in the territory of Norway;
   - Anthrax and swine erysipelas – during the last 20 days in the premises;
   - Trichinellosis – within the last 3 years in the premises.

2. Each individual carcass has been examined for trichinellosis with negative results.

3. The slaughterhouse is authorized for export by the Norwegian Food Safety Authority, is compliant with national hygiene legislation and is under constant supervision.

4. Veterinary post-mortem inspection did not show that meat has alterations indicative for poisoning or other contagious and infectious diseases. Serous coats were intact and lymphatic nodes were not removed before inspection.

5. Meat has no blood clots, abscesses, foreign substances or insect larvae. Meat has normal odour and flavour, was not defrosted during the storage period and shows no signs of decomposition.

6. Meat has not been treated by colourants, ionizing or ultraviolet rays; does not contain means of preserving, is not contaminated by Salmonellas and microorganisms causing other bacteriological diseases.

7. Meat originates from animals raised on feed in which the content of genetically modified raw materials (GMOs) is no higher than that is allowed by EU legislation.

8. According to the national surveillance program on residues in live animals and agricultural products, the meat does not contain residues of substances with natural or synthetic hormones, thyreostatic agents, antibiotics, pesticides or other administrated medicinal products higher than the allowed international limits for the individual substances.

9. Frozen meat holds a temperature in flesh not exceeding minus 8 degrees Celsius. The temperature in chilled meat does not exceed plus 4 degrees Celsius.
10. Meat is recognized fit for human consumption. The animals from which the meat is intended to be exported to the Republic of Georgia, have been subjected to veterinary inspection prior to slaughter, their carcasses and internal organs – to post-mortem veterinary-sanitary inspection by the official veterinary authority.

11. Meat and packaging are marked with readable official health mark of official post-mortem inspection with specification of the name or number of the meat establishment (slaughterhouse).

12. Packaging material is used for the first time and satisfies the necessary sanitary and hygienic requirements.

13. The means of transport are treated in accordance with the rules approved in Norway.
