	Original <input type="checkbox"/>	Replacement <input type="checkbox"/>
	II. Health information	II.a Certificate reference No
		II.b Reference to original certificate if replacement
	I (the undersigned veterinary inspector) hereby certify that:	
	<p>1. <input type="checkbox"/> a) "The Product has been manufactured in the EU/EEA (country of origin: _____) according to the EU regulation (EC) 178/2002 of the European Parliament and the Council of 28 January 2002 laying down the general principles and requirements of food law. The product has been as manufactured and transported laid down with the principles, requirements and procedures covering all stages of food and feed production and distribution accordingly."</p> <p style="margin-left: 40px;">b) "The product was removed from the manufactured member state to the exporting Member States for trade into the Republic of Korea in full conformity the importing sanitation requirements according to the Special Act on Imported Food Safety Control of the Republic of Korea.</p> <p>2. Milk collection, manufacture, processing, packing, distribution, handling and storage of the exported livestock products have been performed in compliance with sanitary regulations on livestock products enforced in the Republic of Korea and these products have been handled and shipped to the Republic of Korea in a manner avoiding re-contamination.</p> <p>3. The exported livestock products were manufactured with raw materials that are derived from animals found to be healthy in testing and examination by the Norwegian Food Safety Authority and that are suitable for human consumption. Raw milk used in the manufacture of such products was periodically controlled and examined by the Norwegian Food Safety Authority.</p> <p>4. The exported livestock products comply with the relevant criteria of standards and specifications regarding food processing in the Republic of Korea on chemical residues (antimicrobial agents, agricultural chemicals, hormones, heavy metals and radioactive materials) and pathogenic microorganisms (Salmonella, Staphylococcus aureus, Clostridium perfringens, Listeria monocytogenes, Enterohemorrhagic Escherichia coli and others) that cause public health risks.</p> <p>5. The exported livestock products were processed according to the sterilization method in accordance with international standards (low temperature for a long period: 63~65°C for 30 minutes, high temperature for a short time: 72~75°C for 15~20 seconds, ultra-high temperature processing 130~150°C for 0.5~5 seconds) or other equivalent or method.</p> <p>6. Description of treatment types:  <input type="checkbox"/> LTLT (63 ~ 65°C for 30 minutes) or equivalent  <input type="checkbox"/> HTST (72 ~ 75°C for 15 to 20 seconds) or equivalent  <input type="checkbox"/> UHT (130 ~ 150°C for 0.5 to 5 seconds) or equivalent  <input type="checkbox"/> Other _____</p> <p>7. Containers or packaging materials for the exported livestock products comply with sanitary requirements in the Republic of Korea and they are made of materials that are clean and harmless to humans.</p> <p>8. The exported livestock products are suitably labeled to show the product name, manufacturer and date of manufacture (or sell-by date).</p> <p>9. The exporter's establishment comply with the following requirements:  a) The establishment is approved and controlled by the Norwegian Food Safety Authority in accordance with Norwegian and EU regulations and also registered with the Korean government.  b) The establishment has a food safety control program according to HACCP and GMP and maintains the relevant records for more than two years.  c) The establishment has documents which describe all operations, from receipt of raw materials to production and release, and specify actions to be taken when non-conformance is found and maintains the relevant records for more than two years.  d) The water used in processing and treatment of the exported livestock products is suitable for human consumption and is in compliance with drinking water regulations.  e) The establishment has a document which describes recall procedures and methods and the exported products can be traceable from production to final sale.</p>	

Part II: Certification

Original <input type="checkbox"/>		Replacement <input type="checkbox"/>	
		II.a Certificate reference No	II.b Reference to original certificate if replacement
<p>10. Norway is recognized by OIE as having risk status as negligible BSE risk. Norway satisfies the condition in chapter 11.5 of the OIE Terrestrial Animal health Code. Norway has a surveillance program according to Regulation (EC) no. 999/2001 of the European Parliament and of the Council of 22 May 2001 laying down rules for the prevention, control and eradication of certain transmissible spongiform encephalopathies. The milk and the dairy products derived from Norwegian cows were officially free from BSE at the time of milking.</p>
