

# MATTILSYNET NORWEGIAN FOOD SAFETY AUTHORITY

## HEALTH CERTIFICATE for export of fresh boar semen from Norway to Switzerland

Serial number									
N	O	-							

Consigning country: **Norway**

Competent authority: **Norwegian Food Safety Authority**

Issuing authority (official veterinarian):

**Norwegian Food Safety Authority, District Office for Hedmarken, Holsetgt. 22, N-2317 HAMAR; by First Inspector ELISABETH NISSEN NORDBYE, c.m.v.**

### I. Origin of semen

Name and address of the AI-centre:

**NORSVIN, P.O.Box 504, N-2304 HAMAR, Norway**

Registration number of the AI-centre: **NO-004HO**

Name and address of consignor:

**NORSVIN INTERNATIONAL AS, P.O.Box 504, N-2304 HAMAR, Norway**

Place of loading: **NORSVIN, P.O.Box 504, N-2304 HAMAR, Norway**

### II. Destination of semen

Name and address of consignee:

**SUISAG, Allmend, CH-6204 SEMPACH, Switzerland**

### III. Identification of semen

Registration or description of shipping container (type, marks):

Name of provider of semen	Breed	Date of birth	Identification number of provider of semen	Number of portions/ doses of semen (straws/ampoules)	Dates of semen collection (beginning and ending)

Method and extent/degree of dilution (with quantitative statement/description of used antibiotics):

The semen is extended with Tri-X-cell® (IMV Technologies, France) to a final concentration of 30 million sperms per ml. Tri-X-cell contains gentamicin, amoxicillin and tylosin. In addition, a combination of lincomycin and spectinomycin is added to the extender to give a final concentration of 150 µg lincomycin and 300 µg spectinomycin per ml.

The identification number of the provider of semen and the date of semen collection (open or coded) are indicated on each dose/portion.

Notes:

- A separate certificate must be issued for each consignment of semen
- The original of this certificate must accompany the consignment to the place of destination

**IV. Health certification**

I, the undersigned official veterinarian, hereby certify that:

1. The semen described above was collected, processed and stored under conditions which comply with the standards in Directive 90/429/EEC.
2. The semen described above was collected from boars on a collection centre which only contains animals that have not been vaccinated against Aujeszky's disease and which have reacted negatively to the ELISA test for Aujeszky's disease, in accordance with the provisions in Directive 90/429/EEC.
3. The semen described above was sent to the place of loading in sealed containers under conditions which comply with the provisions of Directive 90/429/EEC.
4. PRRS has never been diagnosed in Norway.
