Competent regional authority: **The District Office for: Hedmarken, N-2317 HAMAR**

I. Identification of the farm of origin:

Name and identification no. of the farm/premises:

II. Identification of the animal(s):

Total number of animals:

Ear number (right ear):	Sex:	Race:	Date of birth:

III. Origin and destination of the animal(s)

Name and address of consignor:	Name and address of consignee:

IV. I, being an official veterinarian of the government of Norway, declare the following:

- 1) The above mentioned animals are originated from an area in which animal diseases are under control. They have been found healthy, free of signs of any infectious and contagious diseases including ectoparasitism at the time of export. They are considered fit to travel.
- 2) The following diseases have never been reported in Norway: African Swine fever, Teschen Disease, Swine Vesicular Disease, Transmissible Gastroenteritis, Swine Influenza, Aujeszky's Disease (Pseudorabies), Vesicular Stomatitis, PRRS (Blue Ear Disease) and Rinderpest.
- 3) Norway has been free from Foot and Mouth Disease, Brucellosis and Classical Swine Fever (hog Cholera) for the last 10 years.
- 4) The above mentioned animals are originated from an area where no clinical signs or other evidence of Hog Cholera (Classical Swine Fever), Aujeszky's Disease or Porcine Respiratory and Reproductive syndrome (PRRS) has been found during the last 12 (twelve) months prior to export.
- 5) The above mentioned animals are originated from premises where no clinical signs or other evidence of Hog Cholera (Classical Swine Fever), Aujeszky's Disease or Porcine Respiratory and Reproductive syndrome (PRRS) has been found during the last 2 (two) years prior to export, nor has vaccination against these diseases been practised.
- 6) During the 12 (twelve) months prior to export there have been no clinical signs or other evidence of Tuberculosis, Brucellosis, Leptospirosis, Swine Vesicular Disease, Swine Influenza, Porcine Parvovirus Infection, Enterovirus Encephalomyelitis, Transmissible Gastroenteritis, Atrophic Rhinitis, Toxoplasmosis, Trichinosis and *Streptococcus suis* type 2 infection on the premises where the animals have been resident.
- 7) All animals to be exported to Thailand have been born and raised in the farms of origin prior to the export. The farms are accepted as a prophylactic quarantine and are under control of the Norwegian Food Safety Authority.
- 8) Aujeszky's disease, Transmissible Gastroenteritis and PRRS are controlled in the farms once a year by ELISA test (sampled from a minimum of 10 pigs per farm) and Atrophic Rhinitis is controlled by clinical inspections. Brucellosis is not tested regularly in the breeding farms. Porcine brucellosis has never been reported in Norway. The attached document is declaring the animal health situation in Norway.
- 9) The pigs were injected with dihydrostreptomycin (25 mg per kg live body weight) on/..... And on/..... 20.....
- 10) The animals were transported from the farm to the place of loading in thoroughly cleaned and disinfected and vacant vehicles.
